

AlignedAccess™

Cloud Connectivity Made Easy

By 2020, it's estimated that **1.7MB of data** will be created every second for every person on earth

Source: DOMO

As the number of devices and applications continues to grow, organizations require a secure, high-performance and cost-effective way to manage their data and content.

Enter the Cloud

41%

of enterprise workloads will be run on public cloud platforms by 2020

Source: LogicMonitor

Google Cloud Platform

IBM Cloud

83%

of enterprise workloads will be in the cloud by 2020

Aligned offers more flexible, scalable, secure and cost-effective connections to the cloud where and when you need them through Aligned Access.

Aligned Access also enables customers to seamlessly expand their reach and dynamically connect to customers and partners; IT service and network providers; Internet Exchange (IX) platforms; and Internet Service Providers (ISPs) found within our data centers, as well as beyond them.

Reach

Aligned data centers provide on-ramps to major cloud providers, as well as connections from customer facilities or managed infrastructure, to and between Aligned data center locations

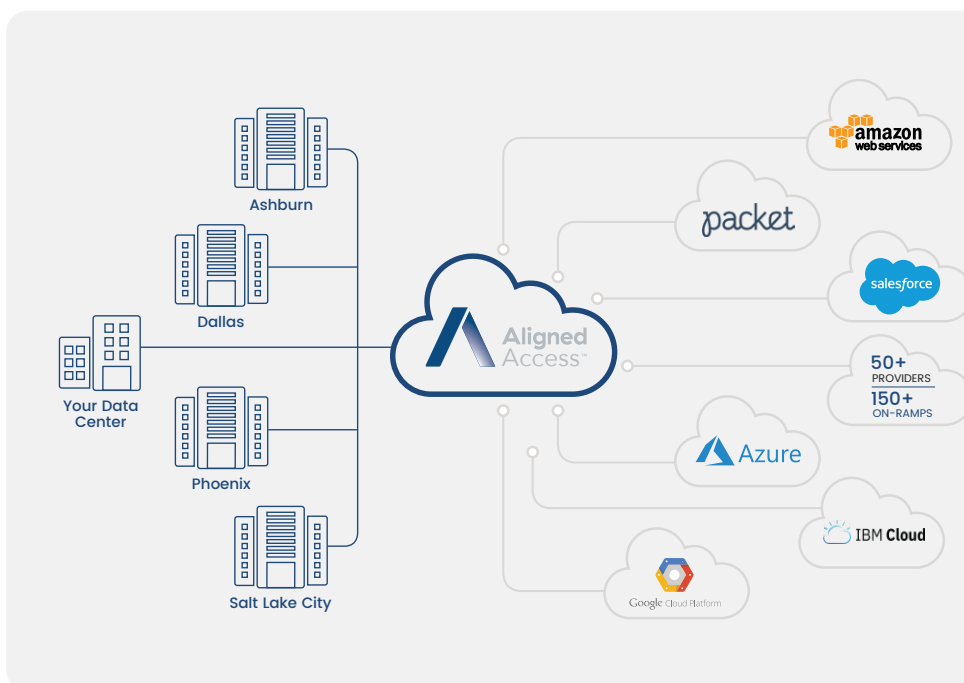

Agility

Flexible connections and scalable bandwidth as your business and workload grows and changes

Simplified Management

Eliminate complex configuration and lengthy provisioning as well as multiple contracts and SLAs

Aligned Access Solutions

Intelligent infrastructure, combined with incrementally scalable technology, allows us to more dynamically meet customer needs. Aligned Access solutions combine cloud, connectivity and colocation to suit the needs of your company. Our adaptable infrastructure and intuitive, Software-defined Network (SDN) seamlessly adapt to your hybrid IT needs.

Aligned Cloud Access

Secure, private and cost-effective hosted or dedicated direct connectivity to leading CSPs. Services can be provisioned from 1Gbps to 100 Gbps instantly from Aligned Energy's data centers in Ashburn, Dallas, Phoenix and Salt Lake City.

Aligned Transport Access

Carrier-grade Layer 2 and Layer 3 transport service offering blended or dedicated IP and point-to-point, high-speed, low-latency, connectivity through a variety of wholesale partners. Available in 10 Gigabit Ethernet increments as dedicated, protected or unprotected circuits.

Aligned DCI Access

Secure, low-latency, high-resiliency and cost-effective Data Center Interconnect (DCI) Access, enabling connectivity from customers' own facilities or managed infrastructure, to and between all Aligned data centers and connected CSPs.

Aligned On-net Access

Seamless, carrier-neutral provisioning and turn-up for highly reliable and low latency connectivity to customers, partners and service providers with no monthly cross-connect fees.

Aligned Data Centers are Strategically Located

Strategically located in regions with robust fiber infrastructure and fast internet connectivity speeds, our facilities offer neutral connectivity to a robust network of top-tier clouds, carriers and telecommunications providers by way of multiple diverse Meet-Me Rooms without monthly interconnection fees. Customer can deploy the speeds, solutions and connections they need.
